## FLAME RETARDANT JACKET

Style: 153

Fabric: 365gsm, 100 Cotton

A classic industry standard flame retardant coat. Manufactured in the well established, 100% flame retardant cotton Proban fabric. A traditional engineers coat to meet the needs of general welding and allied processes.

### Garment Features

- Six (6) concealed front stud fastenings allowing the garment to be fastened to the neck for extra protection
- Three (3) pockets, one (1) breast and two (2) lower pockets with flaps (1cm wider than the pocket) to prevent ingress from welding splatter
- Centre vent on the rear to allow for ease of movement
- Bartacks at stress points for extra strength

### Sizes available

Available in regular & tall fit

Sizing: 92, 100, 108, 116, 124, 132 & 140cm

### Colours Available

Navy
